DIPLOMA SUPPLEMENT

OUTLINE STRUCTURE FOR THE DIPLOMA SUPPLEMENT

The Diploma Supplement was developed by the European Commission, Council of Europe and by UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international transparency and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It is free from any value-judgements, equivalence statements or suggestions about recognition. Information is provided in eight sections. Where information is not provided, an explanation will give the reason why.

- 4.2 **Programme Requirements:** Students completing required courses for the first level Academic Diploma in Oboe will have acquired the technical ability and specific competences that will allow them to express their interpretative personality. To meet this goal, students will study closely the performance techniques and repertoire that are most representative of their instrument. They will also learn to play in ensembles composed of various instruments. Aural training, memorization and specific knowledge related to the organizational, compositional and analytical concepts of music, and their interaction, will also be studied.

Considerable attention will be paid to the student's acquisition of proper emotional and postural control. Upon completion of the three-year degree, students will have attained in-depth knowledge of the general stylistic, historical and aesthetic aspects related to their specific area. In addition, they will be able to carry out improvisation and will possess adequate skills in the use of computer technology for music. The ability to use a second European Union language will also be obtained.

8 INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

Higher Education in Art and Music (*Alta formazione artistica e musicale – Afam*)

Higher Education in Art and Music (Afam) is part of the Italian higher education system.

Afam includes:

- Fine Arts Academies
- Music Conservatories and Recognized Music Institutes
- Higher Institutes for Applied Arts
- National Academy of Dance
- National Academy of Drama

The institutions carry out teaching, production and research in visual arts, music, dance, drama and design. Since the 1999 reform, *Afam*'s educational offering has been structured in three cycles, in accordance with the Bologna Process objectives.

The first cycle is made up of **first level diploma programmes** that aim to provide students with adequate mastery of artistic methods and techniques as well as with specific professional and disciplinary skills. Admission requirements are an upper secondary school diploma issued after a total of 13 years of schooling and successful completion of the required state exams, or a comparable foreign diploma. Admission may also require candidates to take an entrance exam to assess an adequate level of knowledge, in accordance with institutional regulations. There may also be preparatory educational activities carried out in collaboration with upper secondary schools. The maximum number of places available is determined by each individual institution. Study programmes last three years. To obtain the first level diploma, the student must have acquired 180 credits. The diploma gives holders access to competitive exams in the public sector, as well as to artistic careers and further studies in the 2nd cycle.

Second cycle is made up of **second level diploma programs**, which offer students an advanced level of education for complete mastery of artistic methods and techniques as well as a high level of professional competency. Admission requirements are either a first level diploma, a university degree or a comparable foreign qualification. There may also be specific requirements as defined by the different institutional regulations. Study programs last two years and require the acquisition of 120 credits.

Third cycle. This cycle is made up of **Research training programmes**. Their goal is to provide the competences to plan and carry out high-level research activities.

Other courses

Afam institutions may also offer:

- **Specialization courses:** these courses provide high level professional competences in specific areas;
- **Advanced or Master courses:** these courses provide in-depth study in specific sectors as well as professional development, retraining and continuing education. They have a minimum of 60 credits.

Admissions requirements are determined by institutional regulations.

Academic credits: study programs are expressed in academic credits. One academic credit generally corresponds to 25 hours of student workload. The average workload for one academic year is conventionally set at 60 credits.
